Re: Novel Coronavirus

Region 10 Community Members,

This morning I received the attached informational document from the Department of Public Health regarding the Novel Coronavirus that has been in the news so much lately. I have been contact with the state and local health departments throughout the last few weeks as this situation has developed. At this point in time there are no recommended changes to our normal health and sanitation processes. We are sending this document to you, our community members, purely as an informational item.
